

### Scrollbar Setting in Windows 7

If your scroll bars are not showing up in your Blackboard Grade Center, this may fix it.

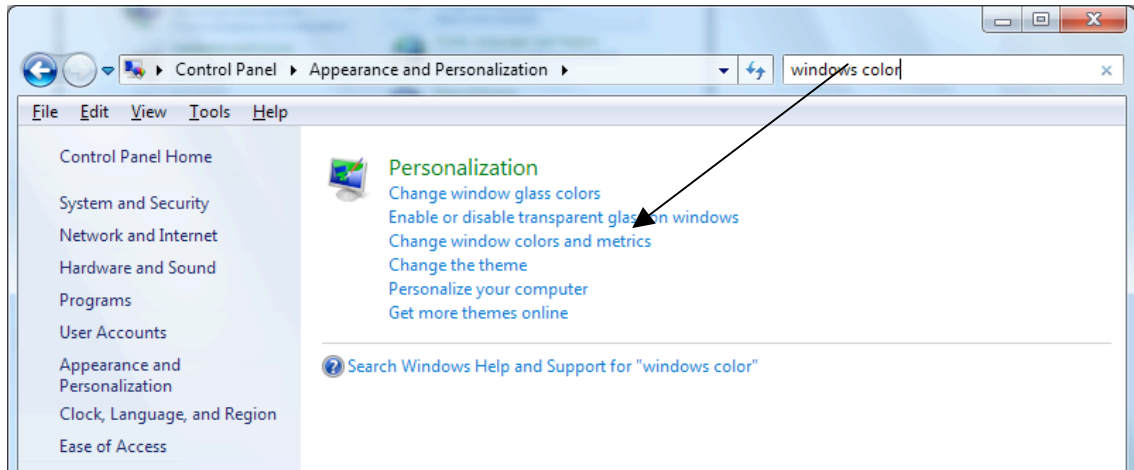

1. Click on the Start button in the lower left hand corner of your desktop and select **Control Panel** from the menu that comes up.

2. Click on **Appearance and Personalization**.

3. In top right-hand search box, type "windows color." It will bring up Personalization and a list. Click on **Change window colors and metrics**.

4. Click on the Item Dropdown (default says Desktop) and select **Scrollbar**. Change the size to a number less than 20, 17 or 18 should work. Click **OK** when you are finished, and your scroll bars should now appear in your Grade Center.
